??

[ABC]

Target Intel

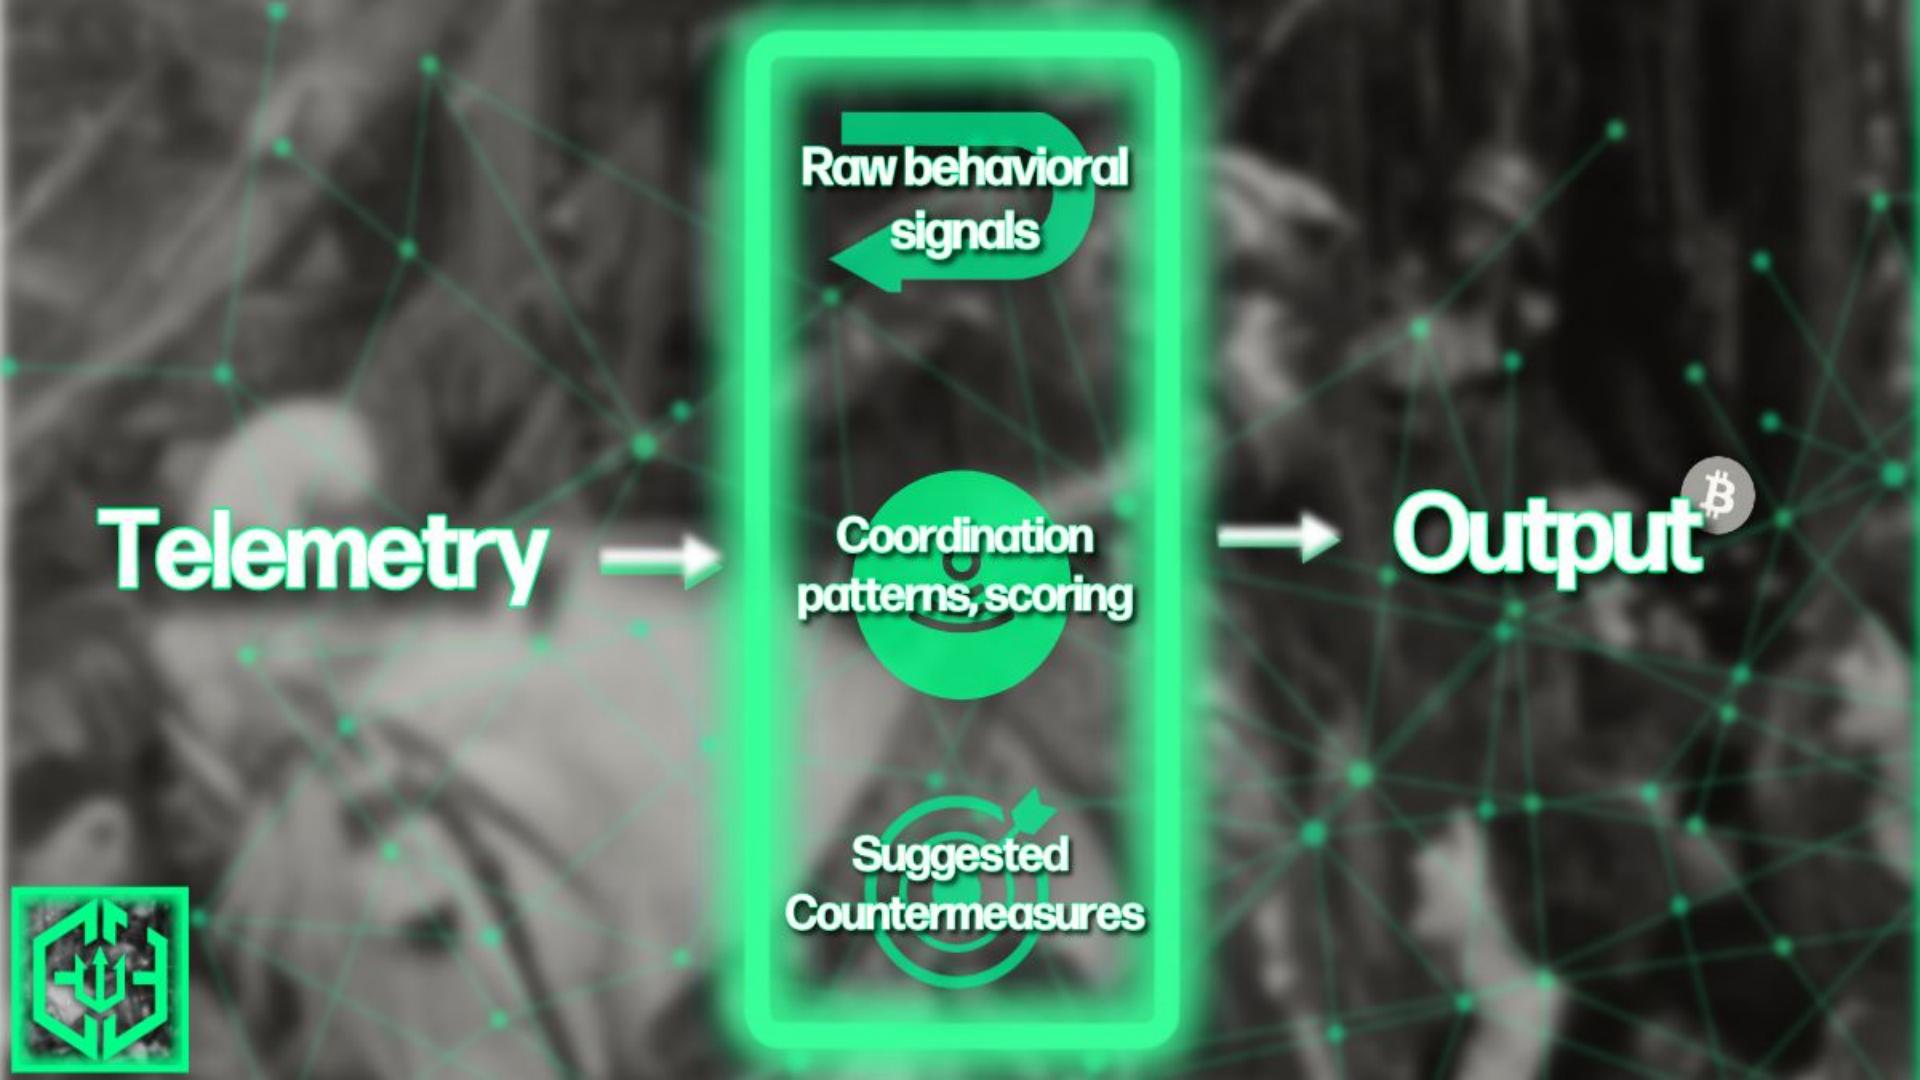

Hades AI
Echo
Nemesis AI

Agencies are explicitly requesting predictive intelligence in FY2026 contracts. First vendor to integrate ABC wins premium pricing.

The diagram illustrates a process flow for handling telemetry data. It begins with the word "Telemetry" in large white letters on a dark background, followed by a white arrow pointing right. This leads into a central vertical column with a glowing green border. Inside this column, at the top, is a green rounded rectangle containing the text "Raw behavioral signals" with a white arrow pointing left. Below this is a green circle containing the text "Coordination patterns, scoring". At the bottom is another green circle containing the text "Suggested Countermeasures" with a circular arrow icon. A large white arrow points from the central column to the word "Output" in large white letters on the right. A small grey circle with a white Bitcoin symbol is positioned above the letter "t" in "Output".
